# Pushpender Singh

Founding Engineer | The Medical Travel Company | Building AI Products from 0→1 with AI-First Workflows  
Gurugram, Haryana, India

## Summary

Full Stack Engineer with 7+ years of experience building and scaling web products using React, Next.js, TypeScript, and AI-assisted development tools. Experienced in owning product architecture, backend APIs, technical SEO, and end-to-end delivery in both startup and enterprise environments.

---

## Experience

The Medical Travel Company  
Senior Software Engineer  
August 2025 - Present (1 year)  
Delhi, India

- Built and maintained a Next.js 16 headless CMS platform using Strapi v5, implementing ISR with on-demand webhook-based cache invalidation for optimized content delivery
- Architected geo-based routing middleware with IP country detection to serve localized content across multiple regions
- Migrated GraphQL data layer from Apollo Client to lightweight native fetch, reducing bundle size and improving performance
- Developed reusable React component library with Tailwind CSS v4, including blog, profile, and layout components with responsive design patterns
- Led development of healthcare CRM platform and Affiliate Portal, enabling lead management, partner workflows, and business scalability

TATA AIG General Insurance Company Limited  
Senior Software Engineer  
November 2023 - July 2025 (1 year 9 months)  
Gurugram, Haryana, India

- Independently developed and led the Payment and Generic modules for the Agent Portal, ensuring seamless functionality and timely delivery.
- Owned the frontend development of User Management, handling API integrations, workflow implementation, and UX discussions.

- Led a team of 2-3 developers, managing the entire project lifecycle while ensuring smooth execution under the SCRUM framework.
- Handled CKYC microservice integration, ensuring smooth interoperability across multiple applications.
- Mentored junior developers, providing technical guidance, conducting code reviews, and promoting best practices.
- Managed the entire frontend architecture, overseeing planning, development, and deployment while ensuring high-quality standards.
- Optimized the Lambda functions, reducing their count from 40,000 to 1,700 across Dev and UAT environments, improving maintainability and resource efficiency.

## Gemini Solutions Pvt Ltd
