SUMMARY

Full Stack Engineer with 7+ years of experience building and scaling web products using React, Next.js, TypeScript, and AI-assisted development tools. Experienced in owning product architecture, backend APIs, technical SEO, and end-to-end delivery in both startup and enterprise environments.

EXPERIENCE

The Medical Travel Company (Remote) — Founding Engineer

Aug 2025 – Present

- Spearheading the concurrent development of multiple mission-critical healthcare systems, encompassing a custom CRM, Affiliate Portal, and patient coordination platforms
- Architected a headless CMS infrastructure utilizing Next.js 16 and Strapi v5 to facilitate seamless multi-region content management for global medical services
- Engineered robust backend APIs and integrated business logic, maintaining a high level of contribution across the entire full-stack ecosystem
- Deployed AI-driven workflows for patient management to automate lead acquisition, medical document processing, and healthcare travel coordination
- Executed sophisticated technical SEO enhancements, including automated metadata, schema implementation, and internationalization for enhanced global search performance
- Built localized user experiences via IP-based routing and middleware to serve tailored content based on the user's geographic location
- Boosted platform performance through Incremental Static Regeneration (ISR), advanced data-fetching, and webhook-based cache management
- Transitioned GraphQL services from Apollo Client to native fetch patterns, significantly minimizing bundle size and improving client-side latency
- Partnered with cross-functional stakeholders and medical operations to define product roadmaps and accelerate the delivery of strategic features
- Established a scalable design system and architectural standards to streamline development velocity across all internal healthcare projects

Tech: Next.js, React, TypeScript, Tailwind CSS, Strapi CMS, GraphQL, REST APIs, Incremental Static Regeneration (ISR), Vercel, Git, Headless CMS Architecture, Geo-based Routing, Webhook Integration, App Router, Static Site Generation

Tata AIG, Gurugram (Hybrid) — Senior Software Engineer

NOV 2023 - JULY 2025 (~ 1.9 years)

- Led development of Payment and User Management modules for Agent Portal serving insurance agents across India.
- Delivered complex business workflows and integrations while coordinating with multiple backend and business teams.

- Managed a team of 2–3 engineers, driving sprint planning, code reviews, and timely feature delivery.
- Improved portal usability and performance through frontend optimization and reusable component development.
- Collaborated with product owners and stakeholders to translate business requirements into scalable solutions.

Tech: ReactJS, Material-UI, Redux, Next Js, SASS, Scrum, Product Management

Gemini Solution, Gurugram (Remote) — Senior Software Engineer

NOV 2021- NOV 2023 (~ 2 year)

- Led frontend development for enterprise-scale insurance platform (**TATA AIG**) while working at a service-based organization
- Architected and built scalable, high-performance web applications using React, Angular, and TypeScript
- Established coding standards and conducted code reviews, improving code quality and long-term maintainability
- Collaborated with client stakeholders and cross-functional teams to deliver end-to-end features in Agile environments

Tech: JavaScript, React.js, Responsive Web Design, Front-End Development, Angular, SASS, Code Review, Scrum

CatalystOne Solutions, Mohali — Software Engineer

JAN 2019- SEPT 2021 (~ 2.9 years)

- Engineered core functionalities for an enterprise-grade HR and workforce optimization suite leveraging Angular and Java architectures
- Systematically refactored legacy codebases to bolster system maintainability and aggressively mitigate long-term technical debt
- Designed and implemented a library of reusable UI components to enhance development velocity and ensure design consistency across internal teams
- Directed Agile ceremonies as Scrum Master, managing sprint planning, retrospectives, and cross-team coordination to ensure streamlined project delivery
- Partnered with product and engineering stakeholders to define and ship high-impact, customer-centric features within a collaborative environment

Tech: JQuery, Bootstrap, Angular, Java, HTML, SCSS

EDUCATION

Tula's Institute – Bachelor of Technology

Aug 2015 - MAY 2019 (4 years)
